

1857 CRACK SEALER HOSE

Tube: Black, blend of high temperature polymers especially compounded to resist swelling and embrittlement in hot asphalt service.

Reinforcement: Two braids of high tensile steel wire.

Cover: Black, heat, oil, abrasion and weather resistant Neoprene (CR).

Temperature: -40° to 350° F.

Premium Features: Abrasion, oil and weather resistant. Heat and oil resistant. Handles intermittent temperatures of hot tar up to 400° F. Lightweight for easy handling at application.
